

Table of Contents

I.	STEM Defined	4		
II.	Why STEAM?	5		
III.	Executive Summary	6-13		
IV.	Current Implementation of STEM	14-28		
	Pre-K STEM			
	Elementary STEM			
	Aerospace engineering			
	Agricultural science			
	Architecture			
	Biomedical technology / medical devices			
	Career and technical education			
	Civil engineering courses			
	Computer-aided drafting and design			
	Computer science courses			
	Energy and the environment			
	Engineering Design			
	Intro to technology			
	Other STEM Implementations			
V.	Emerging Technology	28-30		
VI.	Education & Business Collaborations	31-38		
VII.	Follow the Money	39-51		
	Impact of politics on K-12 STEM budgets	40		
	by role and demographics	41		
	Funding sources by role and grade level	42		
	Other funding sources	43-48		
	Educator spending priorities	49-52		
VIII.	Teaching Teachers About Your Products	53-58		
	Analysis by communication channel	54		
	Analysis by role	55		
	Analysis by grade level	56		
	Analysis by demographics	57		
IX.	Best Months for Marketing & Sales Activities	58		
X.	Social Media	59-63		
	Facebook — Analysis by role, grades taught, demographics	60		
	Twitter—Analysis by role, grades taught, demographics	61		
	Instagram—Analysis by role, grades taught, demographics	62		
	LinkedIn—Analysis by role, grades taught, demographics	63		
XI.	Methodology & Respondents	64-71		
XII.	About Catapult X	72-73		
XIII.	About MCH Strategic Data	74		
XIV.	Appendix—Emerging Technology	75-218		
	(open-ended responses from survey participants)			
	Virtual Reality / Augmented Reality			
	Coding			
	Biotechnology			
	Simulations			
	Internet of Things (IoT)			
	Robotics			
	Gaming			
	Probeware			
	Drones			
	Artificial Intelligence			
	3D Printing			
	Cybersecurity			
	Makerspace			
	Project-based learning			
	Real World			
	Other
